

Can my Partbred Gypsy Cob be registered with the New Zealand Gypsy Cob Association?

Complete the following ...

Please tick:	Yes	No	If you ticked no, then ...
Does your horse have 25% or more Gypsy Cob breeding by parentage?			If your horse is less than 25% Gypsy Cob, it cannot be registered with the NZGCA.
If your horse has one Gypsy Cob Parent, is that parent registered with NZGCA? OR If both of your horse's parents are Gypsy Cobs, are they both registered with NZGCA?			Until the Gypsy Cob parent/s of your horse are registered with NZGCA you cannot register your horse with NZGCA. Please discuss this with the owner of the gypsy cob parent/s of your horse.
Have you DNA verified your horse to its registered Gypsy Cob parent/s?			Complete DNA verification process to have your horse parentage verified to its Gypsy Cob parent/s.
If the sire of your horse a Gypsy Cob/Gypsy Cob Partbred, has he met the stallion health certificate and PSSM1/FIS genetic test requirements?			Until the sire of your horse has completed the stallion health certificate and completed PSSM1/FIS testing your horse cannot be registered. Please discuss this with the stallion owner.
Has your horse or its Gypsy Cob parent/s been tested for PSSM1 and FIS?			Test your horse OR its Gypsy Cob parents for PSSM1 and FIS though InfogeneNZ/Massey University.
Have you taken photos of your horse that meet the registration photo criteria?			Take photos that meet the registration photo requirements.
If you have answered YES to all the questions your horse is ready to be registered. Please apply via the NZGCA website.		If you have answered NO to any of the questions you must address the issue before proceeding. Your horse cannot be registered until you can answer yes to all questions.
